EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Clinton Newton on 2/21/07.

The application has been amended as follows:

Cancelled claims 11-13.

The following is an examiner's statement of reasons for allowance: **The primary reason for allowance is that prior art does not teach a magnet and a metal latch element cooperating to apply a magnetic force for releaseably latching said damper in the open position when moved thereto and in the closed position when moved thereto, wherein the magnet and latch element are arranged to latch the damper each time the shaft rotates through an arc of 90 degrees and additionally prior art fails to teach the requirement of a motor with a stator and a rotor connected directly with the shaft to rotate the shaft when the rotor turns.**

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
